

Best Pack, incorporated in 1984, is owned and operated by Community Living Oakville. We are a provider of customized, flexible, high quality co-packing services with a reputation for completing projects on time and on budget.

Co-Packaging Expertise

Best Pack operates out of a 30,000 square foot facility fully equipped and staffed to handle the co-packaging needs of small businesses and large corporations.

Notable customers are:

- **Ford Motor Company**
- **Newell Rubbermaid**
- **Sanford**
- **Canadian Hospital Specialties**
- **University of Guelph**

Best Pack is particularly adept at handling customized projects that require work to be done manually. Our labour force and processes are ideally suited to jobs that require significant attention to detail and a “hands-on” approach.

**QUALITY OUTCOMES
100% SATISFACTION**

Best Pack is known for its on-time, on-budget project delivery. The staff take great pride in producing quality outcomes.

Best Pack has built its reputation for service excellence over the past 30 years. In a recent survey of its customers, 100% of respondents indicated that they would prefer **Best Pack** over other co-packaging companies. This is a true testament to our people, and the pride they take in performing to the expectations of our customers.

In an increasingly competitive world, distinctive display and packaging will set you apart from your competitors.

Make **Best Pack** an essential partner of your brand identity and printing needs.

THE BEST PACK STORY

Best Pack is more than a co-packaging service provider, it is a social enterprise that supports **Community Living Oakville's** efforts to provide quality services and support to people who have a developmental disability so they can live active, rewarding and fulfilling lives.

Best Pack provides employment opportunities in an inclusive environment.

"When companies do business with Best Pack, they give back to the community."

"Best Pack takes care of your co-packaging needs... you make a difference in people's life."

"To have a co-packer that you can rely on and you do not have to hand hold them ... big advantage ... huge advantage"

CO-PACKING SERVICES

Shrink Wrapping

Shrink wrapping can be performed manually or automatically depending on the size and shape of the item. Shrink bands can also be used to hold two or more items together without shrinking the complete product.

Point of Purchase Displays

Displays are constructed in all shapes and sizes and are assembled and filled to customer specifications. We can provide full service and fulfillment for your display, design, print, die-cut, assembly, filling to specification and shipping.

Bagging and Heat Sealing

Bagging and Heat Sealing, also known as an impulse sealer, a heat sealer uses a resistive heating element to seal and/or cut thin plastic bags or sheets. Rather than using continuous heat, which would turn the bag into a gooey-edged mess, it uses a timed impulse of heat - hence "impulse" sealer. We offer horizontal and vertical high-quality sealing for a wide range of special needs. We provide an outstanding performance of any size and type bags.

Kitting Assembly

The many capable hands at **Best Pack** can make short work on large collation runs and can also assist with sourcing of the appropriate packaging.

Horizontal form - Fill Seal

The machine constructs a plastic bag out of a flat roll of film, while simultaneously filling the bags with product and sealing the filled bags. HFFS machines are used in packaging for a wide variety of products: cosmetics, candies, chocolates, cookies, small electronic accessories, hardware, advertising, and marketing giveaways etc.

UPC Generation and Application

Best Pack supports all UPC bar code types, and uses a triple check system to ensure accuracy; check when created, check as labels are printed, and check again at time of application.
